The Lindquist Center was designed by Walter Netsch using Field Theory. As a result of the octagonal and square geometry, there is no need for interior hallways. Voyage is a sculpture that sits within the courtyard of the Lindquist Center.

**Voyage**

The Seamans Center was the first University structure to move south of the Pentacrest but attempted to continue the Pentacrest's Classicism style with a twist. The years 1906-1927 and accompanying engineering instruments can be seen etched into the panels above the second-story windows.

**Seamans Center**

The Becker Communication Studies Building showcases Late Modernism hallmarks including tinted and mirrored glass and circular vent openings.

**Becker Communication Studies Building**

The outside area allows students and staff to enjoy the river, while also protecting the building from any future flood risks. Hubbard Park, located just south of Iowa Memorial Union, used to be a diverse residential neighborhood with homes and a grocery store.

**Hubbard Park**

The irregular shapes of the Iowa Advanced Technology Laboratories were inspired by Iowa farmscape architecture. The side of the building facing the river features silo and shed shapes.

**Iowa Advanced Technology Laboratories**
