UI TIER update: April 15

Human Resources 10: Establish Clear Policy for Professional and Scientific Staff Search committee Size and Structure

- The April 16 and 22 meetings of the unit HR resource representatives will be used to prepare unit HR reps for their role in using the modified search procedures being implemented on May 1, 2015. Search committees of limited size will continue to be used for positions at Pay Level 6 and above, with other positions relying primarily upon the supervisor and search administrator to conduct a search, utilizing input from others relevant to the position as appropriate.)
- Supervisors will also be receiving information by email as part of the implementation plan. These search process changes will not initially apply to UI Health Care positions.
